# NetAthlon® Event Edition: Fitness Machine Networking Software

The Newest Program for motivating Fitness Machine Interaction!

NetAthlon® uses the latest real-time 3D and networking technologies to enable users of indoor fitness equipment to train or compete in a realistic immersive outdoor training environment. One of its key features is highly-optimized network communication, enabling real-time sessions with multiple live participants. Web Racing™ has been available for years with the Internet providing the network access and allowing fitness enthusiasts to interact.

Fitness centers and clubs have struggled to provide a easy-to-do, cost-effective, and low maintenance networking solution for a group of stationary bikes, rowing machines, or treadmills to network for training or virtual competition!

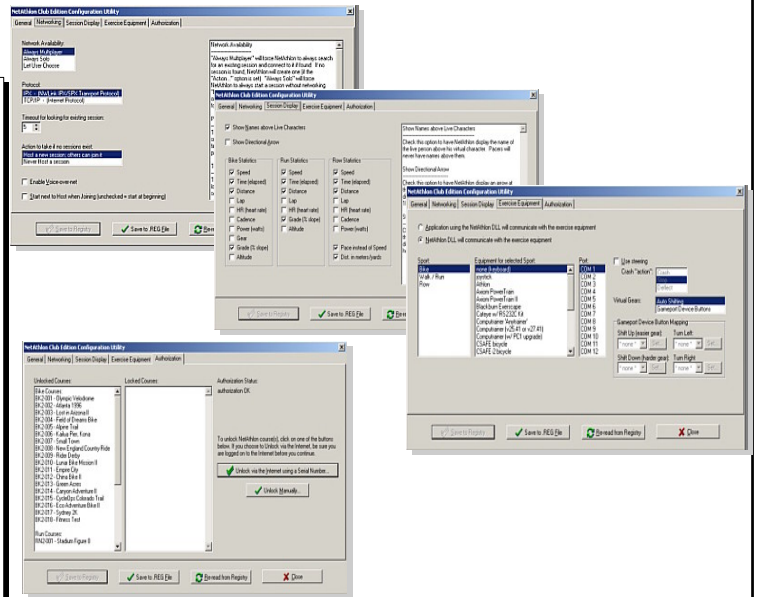

Virtual Competition.....  
....Real Sweat

NetAthlon® Event Edition software is designed for clubs, competitions, displays, and demonstrations and installs on networked PCs in minutes, and permits complete customization. Event Edition searches the network and sets up the fitness machines for “one-click” starts of the event.

### Features:

- ⇒ Installs and setup take minutes.
- ⇒ NetAthlon® Event Edition “finds” the fitness machines and includes them in the training or competitive session
- ⇒ Event Edition supports most fitness machines and cycling trainers and the extensive NetAthlon® Course Library
- ⇒ “Spectator Cam” makes the events into “TV-like” experiences for motivation and entertainment!

Alpine Trail

Speed Skating

Head of the Charles Rowing

Gold Canyon Running

If you are a club, fitness center, or company looking for an interactive experience for your tradeshow or store display, RA Sports has a solution for you. We have provided such solutions to Adidas, Saturn, Disney, Blue Cross, and others. Retention in fitness clubs is enhanced by this program!
