

www.riderunrow.com

Turn ANY exercise bike, bike trainer or rowing machine into a virtual game for home and club use.

RA Sports is offering users a unique solution for PC interactivity for cycling and rowing. Using Wired Technology, you can now and in minutes make your cycling trainer, bicycle fitness machine, or rowing machine, PC interactive and into an expensive training device for on and off Internet training. Partnering with a wired hardware manufacturer, RA Sports offers you this breakthrough product.

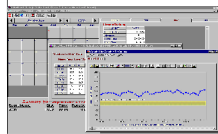

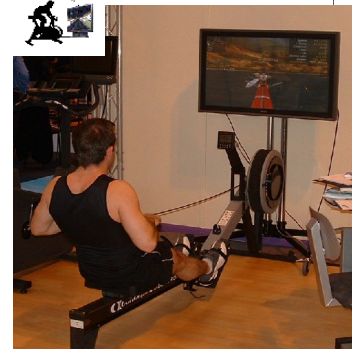

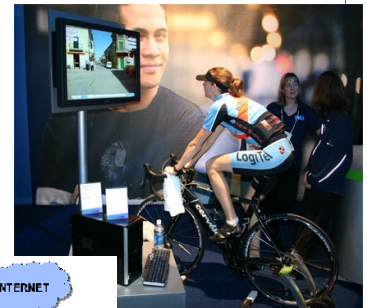

Product Includes:

- 1 - Serial Cable
- 1 - Digital Signal Processor box
- 2 - Speed sensor with cable
- 1 - Wheel magnet
- 2 - Sensor holder
- 1 - Rubber pad
- 2 - Ladder strap
- 1 - Cadence magnet
- 1 - Round tube adapter
- 1 - Clip
- 2 - Self tapping screws

The Peak Training System works with any bike trainer, rollers, spin bikes, exercise bikes or rowing machine. All that is needed is a spinning wheel, and the speed sensor will pickup the speed to activate the virtual interactive software. Peak Training System is easily setup with all the needed sensors, holders and straps included with the system. You will be able to install in minutes. The NetAthlon software is also very user friendly, with it's easy setup, you will be riding in minutes.

Highlights:

- ✦ Easily connects your PC to any exercise bike, bicycle trainer, or rowing machine.
- ✦ Race solo or against computer generated riders.
- ✦ Train against saved rides to re-ride again later.
- ✦ Set speeds and names.
- ✦ Connect to the Internet and ride or race against online rides.
- ✦ Displays performance data such as speed, cadence, time, distance, power, heart rate.
- ✦ Same software used as the other more expensive compu-competitor.

Fully Integrated with UltraCoach™ Software
